

CONTENTS

I. GENERAL LECTURES

Rigid Triple Pendulum with Frictionless Rigid Unilateral Constraints as a Model for Some Technical Objects.....	J. Awrejcewicz G. Kudra (1)
The Influence of Biasing Fields on the Behavior of Piezoelectric Materials	Eveline Baesu Feng-hong Liu (9)
Some Aspects of Nonlinear Dynamics of Discontinuous Mechanical Systems*	Dick H. Van Campen
Roughness and Sign Statistics of Fluid Mechanics*	Shi-yi Chen
Mechanics and Materials Research and Challenges in the Twenty-First Century	Ken P. Chong (14)
Application of Nonlinear Mechanics in Traffic Flow Research	Shi-qiang Dai Li-yun Dong Yu Xue (22)
On Basic Laws and Principles for Continuum Field Theories.....	Tian-min Dai (29)
A New Description of Stress State	Yu-chen Gao (42)
Nonlinear Effects in Wave Scattering and Generation Due to Flow Interaction with Topography	Roger Grimshaw (43)
On the Basic Relationships of the Flow Theory for Strain-Hardening Plastic Solids	A.N. Guz (51)
On Dissipative Nonlinear Evolutionary Problems in Mechanics	Din-yu Hsieh Shao-qiang Tang (54)
A Unified Coordinates Approach to Computational Fluid Dynamics	W.H. Hui (58)
Hyperelastic Media, Acceleration Waves and a Layered Half-Space	A. Jeffrey (68)
Duality for Entropy Optimization and Its Applications	Xing-si Li Shao-hua Pan (79)
Weakly Nonlinear Stability of Moving Jet of Fiber Suspension	Jian-zhong Lin Chang-bin Wang Ze-xuan Zhou (85)
A Vital Innovation in Hamilton Principle and Its Extension to Initial-Value Problems	Gao-lian Liu (90)
Flow Stress Anisotropy in Textured Sheet Metals	Chi-sing Man (98)
Essential Concepts and Applications of Eshelbian Nonlinear Material Mechanics	G.A. Maugin (102)
Lessons from Damage to Pile Foundation Caused by Past Earthquakes in Japan and the Necessity of Nonlinear Analyses of Pile Foundation	Fusanori Miura (109)
Nonlinear Analysis of Smart Composite Plates	J. N. Reddy (116)
Surface Tension Driven Breakup of Viscoelastic Jets	Michael Renardy (129)
On Generalized Routh'S Equations and Variational Principles in Poincaré and Chetayev Variables	alentin V. Rumyantsev (132)
i	
Anisotropic Materials with Invariant Kirchhoff Shear Modulus	Jan Rychlewski (137)
An Les/Caa Method to Simulate Trailing Edge Noise	Wolfgang Schr?der R. Ewert W. A. El-Askary M. Meinke (141)
A Nonlinear Viscoplasticity Theory for Transversely Isotropic Materials	A.J.M. Spencer (149)

Large Deformation Contact of High-Elastic Bodies

.....G. Szefer D. K?dzior (155)

Higher Order Shock Conditions for Curved Shocks in Unsteady Flows

.....Lu Ting Denis Blackmore (160)

A Nonlinear Flexible Wing Theory for Modeling Bird Flight and Fish Swimming

..... Theodore Yaotsu Wu (165)

II. SOLID MECHANICS

II.1 The Theory of Finite Deformation, Constitutive Models, The Theory of Elasticity and Plasticity

A Simple Method for Calculating Interfacial Wave Speed

.....Zong-xi Cai Yi-bin Fu (174)

A Porous Constitutive Description Based on Analysis of a Cylindrical Void-Cell Model

.....Bin Chen Xiang-he Peng Jing-hong Fan (180)

A Viscoelastic Constitutive Model Based on Nonlinear Evolutionary Internal Variables

.....Jian-kang Chen Pei-jun Wei Zhu-ping Huang (183)

Study on Heat Conduction with Nonlinear Boundary and Phase Transition during Quenching

.....Jun-suo Chen Wei-liang Hu Yi-hong Guan Zi-liang Li Miao Zhang (187)

On the Response Functions of Hyperelastic Materials with Internal Constraints

.....Liang-sen Chen Ming-fu Fu (193)

Nonlinear Elasto-Viscoplastic Model for Concrete Subject to Impact Loading

..... Shu-yu Chen (197)

Propagation of Phase Boundary Involving Reverse Transition under Impulsive Loading

.....Xiang-yu Dai Z.P Tang Song-lin Xu Yang-bo Guo (200)

New Laws and Principles for Continuum Mechanics–Part I. Balance Laws and Equations

.....Tian-min Dai (206)

New Laws and Principles for Continuum Mechanics–Part II. Energy Rate and Power

.....Tian-min Dai (210)

Small Crack Tip Cyclic Behavior in Dual-Phase Al-Si Alloys

.....Jing-hong Fan David L. McDowell Mark F. Horstemeyer Ken Gall (213)

Multi-Scale Cyclic Plasticity with Size Effects

.....Jing-hong Fan Zhi-hui Gao Xiang-guo Zeng (220)

A Physically-Based Meso-Electro-Mechanical Model for Pmn-Pt-Bt Ceramics Behavior

.....Jing-hong Fan (226)

A Phenomenological Model for the Non-Linear Magnetomechanical Coupling

in Ferromagnetic Materials Dai-ning Fang Xue Feng Keh-chih Hwang (231)

ii

Damage Mechanism Based on Incompatible Deformation

.....Ming-fu Fu Wu-gui Jiang H. Stumpf (235)

Landau-Ginzburg Solution for Imperfect Ferroelectrics

.....D. Gao J.F. Li D. Viehland (242)

Elasto-Plastic Analytical Solution for an Internally Pressurized Thick-Walled

Cylinder Using a Strain Gradient Plasticity Theory X.-L. Gao (249)

Elastic Waves in an Elastic Medium Containing an Inclusion with Interfaces

.....Chao Hu Feng-ming Li Wen-hu Huang (256)

The Recent Advances in Tensor Representation... ..Yong-nian Huang (262)

A Moving Griffith Crack in an Anisotropic Piezoelectric Material

.....Ai Kah Soh Jin-xi Liu Kwok Lun Lee (267)

Asymptotic Dynamic Solution to the Mode II Propagating Crack-Tip Field in

Elastic-Viscoplastic Material	Fan-chun Li Qing Chen (272)
A Spherical Cavity-Expansion Penetration Model for Concrete Targets with Crushing Effects	Yi-han Lin Di Zhang (277)
The Chaotic Phenomena on the Low Cycle Fatigue Crack Propagation	Chang-hong Liu Qiu Chen (281)
Guided Harmonic Waves in Two-Layered Piezoelectric Plate	J. M. Orellana B. Collet (284)
Analysis of Polycrystal Cyclic Plasticity with a Nonclassical Hardening Law and Hill'S Self-Consistent Scheme	Xiang-he Peng Ling Wan Xiao-min Zhang (289)
Thermoelectroelastic Solutions for Internal Bone Remodelling Process	Q.H. Qin (294)
A Model of the Thermo-Diffuso-Mechanical Problem in the Framework of the Generalized Standard Media. Implementation to Elastic and Viscoelastic Polymers	G. Rambert J.C. Grandidier L. Cang émi Y. Meimon (298)
Cavitated Bifurcation for Incompressible Anisotropic Hyperelastic Spheres	Jiu-sheng Ren Chang-jun Cheng (303)
A Wave Hierarchy Approach to Thermoelasticity	N. H. Scott (309)
Cavitated Bifurcation in Hookean Elastic and Elastic-Plastic Materials	Xin-chun Shang Chang-jun Cheng Yin-yan Hu (315)
Stress-Strain Constitutive Relation for Porous Medium	Long-tan Shao Yi-zhen Sun (320)
Conservation Laws and Fracture in Nonlinear Elasticity	J.Sivaloganathan (325)
Formulation of Martensitic Transformation under One-Dimensional Impact	Shun-cheng Song Hong-nian Cai (330)
The Incremental Variational Equations and Incremental Element Formulae of Finite Deformation Mechanics	Yan-qi Song (334)
Damage Theories Based on Irreversible Thermodynamics for Various Damaged Materials	Xue-song Tang Chi-ping Jiang Jian-long Zheng (339)
The Study of Martensite Phase Transformation Induced Stress	Ya-qin Tao Yi-hong Guan Zi-liang Li Jun-ruo Chen (345)
iii	
Nonlinear Electroacoustic Properties of Oriented Pb(Mg_{1/3}Nb_{2/3})O₃-PbTiO₃ Crystals	D. Viehland J.F. Li (350)
Subsonic Interfacial Slip Waves Propagating along the Interface between Two Smoothly Contact Anisotropic Elastic Solids with Separation	Yue-sheng Wang Gui-lan Yu Nan Li (357)
A New Theory of Constitutive Relation for Thermo-Elasto-Plastic Problems in Porous Medium	Jian-xing Wang Jian-guo Ning (364)
Nonlinear Viscoelastic Behavior of Epoxy Polymer? Experiments and Constitutive Modeling	Zi-hui Xia Fernand Ellyin Ya-fei Hu (368)
On the Solution of Davidenkov and Spiridonova	Da-wei Xue (374)
Vibrations of Rotating Piezoelectric Structures and Angular Arte Sensors	Jia-shi Yang (378)
Effect of Matrix Constraint on the Tensile Deformation of Niti Superelastic Wire	X.B.Yu Z. Zhong Q. P. Sun (383)
Wave Scattering to the Crack Between Piezoelectric Layer and Semi-Infinite Elastic Substrate	

.....	Shou-wen Yu Bin Gu (388)
The Method of Flexibility Matrix Diagonalization for Constructing Nonlinear Hybrid Finite Elements...	Can-hui Zhang Wei Feng Qian Huang (394)
A Practical Nonlinear Viscoelastic Constitutive Model and Its Applications	Wei-min Zhang Chun-yuan Zhang Ping Zhang (398)
Uniform Boundedness of the Solution Set of the BVP of the Nonlinearly Elastic Ring	Yiqun Zhuang (403)
II.2 The Nonlinear Theory of Plates and Shells	
Error Estimation to the 2-D FEM for Different Young'S Modulus when Tension and Compression Loadings	Tong Chen Zhi-ming Ye (408)
The Bifurcation of a Micro-Hole in a Plate of Nonlinear Piezoelectric Material	W. Q. Chen H. J. Ding (412)
Analysis of Energy Barrier and Thermal Post-Buckling Behavior of One-Way Restrained Point Stud Shell Ring	Qin-shan Fan Yan Liu (417)
Buckling and Postbuckling Analysis of Viscoelastic Nonlinear Annular Plates with Initial Imperfections	Xiao-jun Fan Chang-jun Cheng (425)
Piezoelectric Multilayer Plates: Sensor, Actuator and Vibration Aspects	A. Fernandes J. Pouget (429)
Analysis of Edge Waves Using a Stroh-Like Formulation	Yi-bin Fu (434)
Nonlinear Dynamic Response of Beam-Plates with a Delamination	Yi-ming Fu Zhi-kun Hou (440)
Nonlinear Dynamical Responses of Viscoelastic Laminated Plates	Hao Hu Yi-ming Fu (449)
Large Deformations of Circular Plates Subjected to a Transversely Non-Uniform Temperature Rise.....	Shi-rong Li You-he Zhou Zhao-chun Teng (454)
Nonlinear Boundary Conditions in Kirchhoff-Love Plate Theory	Christian Licht Oana Iosifescu G érard Michaille (459)
iv	
Analysis of Thin Piezoelectric Materials by an Advanced Boundary Element Method	Yi-jun Liu (463)
Nonlinear Vibration of Structure Composed of a Thin Annular Plate and a Shallow Conical Shell	Lian-sheng Ma Yong-gang Zhao Xin-zhi Wang Ping Qu (468)
Magnetoelectricity of Multiferroic Composites	C.W. Nan Y. Lin (472)
Imperfect Reticulated Shallow Spherical Shells on Springs	G.H. Nie H.Y. Mao (474)
Elastic and Piezoelectric Coupling in an AlN Plate	E. Pan B. Yang (479)
The Non-Linear Unsymmetrical Buckling of Circular Shallow Spherical Shells under Action of Wind Load	Sheng-li Qin Xiang-mu Kong Xiu-feng Ma Jian-ping Zhao (484)
Long Wave Motion in a Mooney-Rivlin Layer with Fixed Faces	Graham A. Rogerson Aleksey V. Pichugin (488)
Interface Model and Non-Linear Theory of Laminated Shallow Shells	Zhi-wei Wang (493)
Nonlinear Vibration of Bimetallic Circular Thin Plates under Stationary Thermal Loads	Yong-gang Wang Shi-liang Dai (499)
Dynamic Bifurcation on Circular Thin Plate with Shallow Sine-Waveshape	Xin-zhi Wang Gang Wang Xi Song Xue-xing Ding (504)

The Research on Anomalous Response on Elasto-Plastic Plate with Large Deformation	
.....	Gui-ying Wu Nian-mei Zhang Gui-tong Yang (508)
Nonlinear Dynamic Snap-Through of Laminated Spherical Caps including Third-Order Transverse Shear Deformation	
.....	Yi-qian Yang Zai-tian Ke (512)
Geometrically Nonlinear Analysis of Composite Laminated Plates Using High-Order Shear Deformation Theory	
.....	Jia-ming Yang Liang-xin Sun (517)
Numerical Analyses of Post-Buckling of Driving Thin Plate in Shuffling MEMS with Geometrical Nonlinearity	
.....	Xiao-bin Yang You-he Zhou (521)
Final State Sensitivity of Viscoelastic Plates under a Step Load	
.....	Neng-hui Zhang Chang-jun Cheng (526)
Non-Linear Analysis for Structure Composed of a Thin Annular Plate and a Shallow Conical Shell	
.....	Yong-gang Zhao Jing-ning Yang Shi-rong Li Lian-sheng Ma (531)
Finite Element Perturbation Analysis for Nonlinear Bending of Swing Expansion Joint	
.....	Wei-ping Zhu (536)
II.3 Nonlinear Mechanics of Structures	
Buckling of Steel Box Sections Subjected to Compression and Bending	
.....	Tim Bond Alan Brewis Long-yuan Li (540)
Acquiring Appropriate Objective Functions during Optimal Vibration Design of the Piping System	
.....	Yan-qiu Chen Qin-shan Fan Zi-gen Zhu (544)
Large Axially Symmetric Deformations and Bifurcations of a Hyperelastic Rod Subjected to Static Load	
.....	Hui-hui Dai Qin-sheng Bi (550)
Dynamic Model of Rolling Interface for Rolling Chatter	
.....	Ji-an Duan Jue Zhong (555)
Tensile Deformation of Shaped Charge Jets with Nonlinear Hardening under Initial Velocity	
.....	Min Fang Jing-wu Gao Zhong-min Cai Zhi-min Zhang (561)
v	
Dynamic Response of a Nonlinear Viscoelastic Rod under the Consideration of Transverse Inertia	
.....	Jing-wu Gao Gui-lian Li Zhong-min Cai (565)
Optimum Design and Sensitivity Analysis of Buckling for Piezoelectric Truss Structures	
.....	Yuan-xian Gu Guo-zhong Zhao (569)
The Dynamic Buckling of Elastic Bar Impacted by a Rigid Body	
.....	Zhi-jun Han Jing-chao Wang Guo-qiang Cheng Shan-yuan Zhang (576)
A Method to Estimate the Blasting Vibration in Rock Slope	
.....	Yun-long He Ling-ling Wang (580)
Transverse Creep Vibrations of a Beam with Fractional Derivative Constitutive Relation Order	
.....	Katica (Stevanov) Hedrih (584) c i&
Electroelastic Structures under Biasing Fields	
.....	Yuan-tai Hu Jia-shi Yang Qing Jiang (596)
Deployment Dynamics of Solar Panel Arrays by Hamiltonian Equations and Deprit's Variables	
.....	A.Y. T. Leung Jinlu Kuang (601)
Lagrange Method and Its Application to Inelastic Structure	
.....	Yong-he Li Ying-di Liu Yi-ping Qin Jun-li Gao (609)
Dynamical Behavior of Timoshenko Beam with Nonlinear Fractional Derivative Constitutive Relation	
.....	Gen-guo Li Zheng-you Zhu (615)
A Helicoidal Model for Bending of Turbomachinery and Drilling Structures	
.....	C.W. Lim A.Y.T. Leung (620)
Dynamic Buckling of Elastic Column under Axial Impact Loading	

.....	...Hong-wei Ma Li-jun Zhang Jin-lan Sun (627)
A Nonlinear Model for the Strength of Thin Tubesheet Structure	
.....	Yong-qi Ma Wei Feng (631)
Critical Load for HDAJ Spliced Pile with Initial Horizontal Displacements in Elastic Ground	
...	Fusanori Miura Yuan-yuan Zhu (634)
Experimental Study and Simulation Analysis on the Connectivity at Cast-In-Place Pile's Cap Jointed with Nonlinear Device	
.....	Takaaki Miyasaka Fusanori Miura Hiromitsu Izumi Kichisaburo Naganuma (645)
The Elastic and Plastic Analysis for the Linearly Elastic and Power Hardening Structure of the Bars Jointed to Moving Rigid-Body	
.....	Xin-hua Ni Xie-quan Liu Jin Liu (651)
Stress Distribution around the Tip of the Dynamically Propagating Interfacial Crack	
.....	Ruzica R. Nikolic Jelena M. Veljkovic (656)
Nonlinear Analysis of Cable Structures	
.....	Wei Peng Jin-chun Tang (662)
Study on Local Dynamic Effect under Stochastic Fluctuation Wind Pressure	
.....	Shu-ying Qu Xin-jian Wang Rui-feng Zhang (666)
Active Vibration Control of an Electrorheological Sandwich Beam	
.....	Jian-ting Ren Jie-sheng Jiang (671)
Dynamic Model of a Flexible Multibody for Coupled Rotor/Fuselage	
.....	Hua-ping Tang Dong-yun Wang Ji-cheng Liu (677)
Application of Beyond-All-Orders Asymptotics to a One-Dimensional Buckling Model	
...	M. Khurram Wadee Ciprian D. Coman Andrew P. Bassom (683)
vi	
The Stability of a Screw Dislocation in a Two-Phase Piezoelectric Layer	
.....	Xiang-qin Wang Jin-xi Liu (687)
Buckling Analysis of Thin-Walled Curved Beams	
.....	Jin-ming Wang Li-fu Liang De-min Chen (691)
Nonlinear Vibrations of Cables Considering Loosening	
.....	Qingxiang Wu Kazuo Takahashi Shozo Nakamura (696)
Using New Method to Establish Mathematical Model of Springback Prediction in Sheet Metal Forming	
.....	Jing-jing Xu Xiu-mei Wang Yi-min Wu (701)
Nonlinear Dynamic Models of Nano-Structure Evolution in Irradiated Materials	
.....	Kai-yu Xu (709)
Stiffness of Pile in Nonlinear Soil	
.....	X. Yang K.T. Chau (714)
Topology Optimization of Continuum Structures Using High Performance Finite Elements	
.....	Zhen Yuan Lu Yin Shuang-xi Chen Chang-chun Wu (717)
Applications of Nonstationary, Nonlinear Data Processing and Analysis in Earthquake Engineering	
.....	Ray Ruichong Zhang (721)
The Dynamics Behaviors and Wave Properties of Finite Deformation Elastic Rods with Viscous or Geometrical-Dispersive Effects	
.....	Shan-yuan Zhang Jian-gang Guo Nian-mei Zhang (728)
Dynamic Buckling of a Free-Flight Rod Impacted on a Rigid Target	
.....	Xiao-qing Zhang Xiao-hu Yao Jian-guo Ning Gang Wang (733)
Elastic-Plastic Analysis of Composite Beams	
.....	Jing-zhi Zhou Tian-qing Yu Jian-ming Xong (737)
III. FLUID MECHANICS	
Interaction Energy of Point Vortices	
.....	Khanh Chau Le Victor Berdichevsky (742)

Self-Organization Process in a 2D Cellular-Automaton Model of Traffic Flow	
.....	Makoto S. Watanabe (747)
Motive Thermodynamics of Multiphase Flows	A.T. Sukhodolsky (752)
Variational Principles of Non-Linear Fluid-Solid Interaction Dynamics in an Arbitrary-Lagrangian-Eulerian Description	J. T. Xing W. G. Price (759)
Internal Waves of Stratified Fluid Flow over Different Bottom Topographies	
.....	Roger H. J. Grimshaw Zhi-ming Lu (766)
Measurement and Prediction of Pollutant Level in Public Taxi Transport Interchanges in Hong Kong	
.....	Wei-zhen Lu Xie-kang Wang Andrew Y.T. Leung Kowk-kit Yuen (771)
Particle Dispersion Modelling Using an Algebraic Slip Model with Moving Grids	
.....	A.G. Gerber S.Ji A.D. Ferreira A.C.M. Sousa (778)
The Complicated Vortex Flow over a Delta Wing Studed by Laser Sheet Visualization and Computational Simulation	
.....	Carl Holden K. X. He Alan Chow Jiada Mo (784)
Comparison between Normal and Oblique Shock Induced Vortex Breakdown Definition of Stability Criteria	O. Thomer W. Schröder E. Krause (792)
Dynamics of Compressible Vortex Filaments	Lu Ting (800)
Hamiltonian Analysis of Vortex Filaments	Denis Blackmore (807)
vii	
Properties of Energy-Enstrophy Theories for 2D Vortex Statistics	
.....	Chjan C. Lim (814)
Patterns in 2-D Dynamic Phase Transitions	Shao-qiang Tang (820)
Vorticity, Helicity and Enstrophy Measurements in a (4:1) Prolate Spheroid Separated Flow	
.....	Zhonglei Wei Kaijian Wang Chonglu Yin Fabu Lin Qingguo Meng (824)
Artificial Parameter Method and Inverse Perturbation Problem: New Directions in Singular Perturbation Theory	Gao-lian Liu (829)
A Conservation Law in the Philips's Model and Its Application	
.....	Jie Xiang Qijun Gui (836)
Application of Regularization Ideas in Ill-Posed Problems of Ocean Variational Data Assimilation with Local Observation	Si-xun Huang Wei Han (840)
Study on Characters of Magnetorheological Fluids and Magnetorheological Damper	
.....	Chao Xiong Jian-gang Lu Jin-qiu Zhang Zhi-ning Li (845)
A Variational Principle for Fully Coupled Fluid-Solid Seepage in a Deforming Porous Medium	
.....	Ping-chuan Dong (849)
Experimental and Numerical Simulation of Nonlinear Coupled Fluid-Solid Seepage in a Deforming Fractured Reservoir	Ping-chuan Dong (854)
A Fully Coupled Finite Element Solution for Gas-Oil Flow in Nonlinear Deforming Fractured Reservoirs	Ping-chuan Dong (858)
Comparison Study of Dynamical Behavior of Counter-and Co-axial Shear Flows	
.....	Xi-lin Xie Wei-wei Ma Hui-liang Zhou (864)
Experimental and Numerical Study on the Process of Liquid Explosive Dispersal	
.....	Jue Ding Pei-fen Weng Jiacong Liu (871)
Evolution of Solitons in Approximate Equations of Long Water Waves	
.....	Jie-fang Zhang Yu-lu Liu (877)
The Stratification Feature of Steady State Mass Flux for a Self-Regulating Grain-Air System	
.....	Li-hong He Xiao-jing Zheng Jian-jun Wu (881)
Numerical Simulation of the Shaped Charge Jet	

.....	Li Hao Cheng Wang Jian-guo Ning (885)
An Arithmetic of the Moving Interface for Three-Dimensional Flows	
.....	Long-wei Chen Jian-guo Ning (889)
Numerical Study on Annual Jet and Its Penetration	
.....	Cheng Wang Jie Lu Jian-guo Ning (893)
Differential Quadrature Method for Solving the Coupled Incompressible Navier-Stokes Equation and Heat Equation	
.....	A.S.J.Al-Saif Zheng-you Zhu (897)
A Uniformly Valid Second-Order Solution of Ship-Wave in a Two-Layer Fluid of Finite Depth	
.....	Gang Wei Jia-chun Le (902)
Inverse Hydrodynamic Design of Centrifugal Pump Impeller	
.....	Wen-guang Li (908)
Analysis of Phase Transition of Traffic Flow in a Two-Layer Network via Cellular Automaton Model	
.....	Yu Xue Shi-qiang Dai Guo-qing Gu (913)
Sensitive Driving Cellular Automaton Model for Traffic Flow	
.....	Yu Xue Li Lei (919)

The Continuous Approximate Selection Theorems and an Application for the Equilibrium of Games	
.....	Yu-guang Xu Ze-qing Liu Yi-xin Wen (1276)
Iterative Approximation of Solution of Equations with Φ-Accretive Or Φ-Dissipative Operators	
.....	Yu-guang Xu Fang Xie (1280)
The Global Phase Portraits of a Nonlinear Equation	
.....	Zhi-yan Yang Tao Jiang (1284)
Symmetry Breaking Rotating Wave Bifurcation in Nonlinear Problems with $O(2) \times O(2)$-Symmetry	
.....	Zhong-hua Yang Chang-pin Li (1288)
Limit Cycle in a Class of Quadratic System	
.....	Chen-xi Yang Min-ying Tang (1291)
Interval Criteria for Oscillation of Forced Second Order ODEs	
.....	Qi-gui Yang (1295)
Three Ways to Obtain Peakons of the CH Equation	
...	Ji-dong Yi Zheng-rong Liu (1300)
Coiflets-Based Method in the Solution of Nonlinear Dynamic System Containing Fractional Derivative.....	
	Ji-zeng Wang Dongpyo Hong Seongyoun Huang (1304)
Generalized Quasi-Variational-Like Inclusion arising from an Elastoplasticity Problem	
.....	Lu-chuan Zeng (1309)
The System of Nonlinear Damped Beam Equations Acted by the Joint Effect of Winding and Twisting.....	
	Jian-wen Zhang Qin-shi Li Gui-tong Yang (1313)
The Symmetry Reduction, Exact Solutions of Belov-Chaltikian Lattice	
.....	Jun Zhang Zu-liang Pan (1317)
On a New Family of Pade-Type Approximants in Multivariables	
...	Cheng-de Zheng Ren-hong Wang (1321)

《CIMS 论文的天地》声明

本站免费向大家提供论文全文，本站论文除了特别说明的以外都是从作者手中征集得到的。

目前网上论文网站较多，有人非法转载本站论文，在此提出警告，本站保留对这类行为进行追究的权利。
