

International Technology and Innovation Conference 2006 — Advanced Manufacturing Technologies  
《技术与创新国际学术会议 — 先进制造技术》 目录

| Number | Title                                                                                                                                         |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| 01001  | Selective laser sintering of $\beta$ -tricalcium phosphate for bionic scaffold                                                                |
| 01002  | Research on Intelligent CAPP System Based on PDM                                                                                              |
| 01003  | Development and application of a prototype micro EDM machine                                                                                  |
| 01004  | Optimization Methods of the Product Assemble Line System                                                                                      |
| 01005  | Development and Manufacture of Visual Miniature Loop Heat Pipe                                                                                |
| 01006  | Study on Technology of CNC Whirlwind Enveloping milling for Screw                                                                             |
| 01007  | Temperature-gradient transient liquid phase bonding under a light pressure                                                                    |
| 01008  | Ultrasonic-Electrodeposited Ni-AlN Composite Layers and Characterization                                                                      |
| 01009  | EXPERIMENTATION AND NUMERICAL SIMULATION OF THE MANUFACTURE OF AN ELLOPSOISAL WORKPIECE BY MULTI-POINT SANDWICH FORMING                       |
| 01010  | Research of the Method for the Order Planning of the Iron-Steel Enterprise Based on the MTO Management Architecture                           |
| 01011  | STATISTICAL ANALYSIS OF RESONANCE FREQUENCY ERROR FOR ULTRASONIC WELDING MACHINE TRANSDUCER                                                   |
| 01012  | A PEAR-TO-PEAR COLLABORATIVE PRODUCT DESIGN PLATFORM FOR DISPERSED NETWORK MANUFACTURING                                                      |
| 01013  | Jaw plates wear analysis for jaw crusher design                                                                                               |
| 01014  | A Multi-agent Ant Colony Optimization Algorithm for Earliness/Tardiness Scheduling with Different Due Window on Non-uniform Parallel Machines |
| 01015  | EFFECTS OF ELECTRON BEAM LOCAL HEAT TREATMENT ON FATIGUE PROPERTIES FOR Ti-6Al-4V ALLOY JOINTS                                                |
| 01016  | Development of Network Control System Based on Rapid Prototyping Instrument                                                                   |
| 01017  | Optimization on Maintenance Rate for Power Plant Equipment Based on Probabilistic Risk Assessment                                             |
| 01018  | STUDY ON THE CONTINUOUS QUALITY IMPROVEMENT SYSTEMS IN SEMICONDUCTOR ASSEMBLY                                                                 |
| 01019  | A Multi-phase and Multiple Objectives Analysis Approach for Optimizing Performance of Supply Chain                                            |
| 01020  | STUDY ON CONSTRUCTION AND APPLICATION OF PRODUCT REQUIREMENT DESIGN ONTOLOGY                                                                  |
| 01021  | A METHOD OF RAPID FACE-STRUCTURED PROFILOMETRY WITH PROJECTING GRATING                                                                        |
| 01022  | Study on velocity model of tracing measurement equipment during crankshaft noncircular grinding process                                       |
| 01023  | Technology and Innovation Performance of Manufacturing Industry Clusters: Experience from Liaoning Province, China                            |
| 01024  | Study of Product Model and Product Configuration Based on the Mass Customization                                                              |
| 01025  | HYDRO-FORMING OF TAILOR-WELDED BLANKS                                                                                                         |
| 01026  | RESEARCH ON MOTION PRECISION FOR A HIGH SPEED ADJUSTABLE ROTOR SET                                                                            |
| 01027  | STUDY ON FLOW FIELD OF TURBINE BLADE WITH FLEXIBLE 3-ELECTRODE FEEDING METHOD IN ECM                                                          |
| 01028  | THE PATH LAYOUT METHOD OF DRILLING HOLES BASED ON UNIFORM DISTRIBUTION AND ITS APPLICATION                                                    |
| 01029  | STUDY ON KANZEL-DRIVING KNOWLEDGE BASE MODEL TO SUPPORT RAPID PRODUCT DESIGN                                                                  |
| 01030  | Effects of Ultrasonic Impact Treatment on the Residual Stress and Fatigue Performance of Ultrahigh Strength Steel Weld Joint                  |
| 01031  | THE INNOVATIVE STUDY OF CUTTING TECHNOLOGY BASED ON TRIZ EVOLUTION THEORY                                                                     |
| 01032  | THE ELECTRICAL CHARACTERISTIC SIMULATION OF CANTILEVER BEAM USED IN MICRO BATTERY                                                             |
| 01033  | The Relationship between the System Cost and the Bullwhip Effect in Time-based VMI Consolidation Replenishment System                         |
| 01034  | RESEARCH ON A SIMULATION SYSTEM FOR PROCESS CAPACITY OF RECONFIGURABLE MANUFACTURING SYSTEMS                                                  |
| 01035  | An New Desirability Function based Method for Multiresponse Robust Parameter Design                                                           |

International Technology and Innovation Conference 2006 — Advanced Manufacturing Technologies  
《技术与创新国际学术会议 — 先进制造技术》 目录

| Number | Title                                                                                                          |
|--------|----------------------------------------------------------------------------------------------------------------|
| 01036  | FORMALIZING EFFECT FOR FUNCTIONAL DESIGN BASED ON FUSION AND Z                                                 |
| 01037  | The Study on Hybrid Production Scheduling based on TOC                                                         |
| 01038  | RESEARCH OF MEASUREMENT THEORY FOR COMPLEX SURFACE BASED ON ANNULAR ROLLER PROBE                               |
| 01039  | A new offset approach for curves on triangle mesh surfaces                                                     |
| 01040  | RESEARCH ON NC PROGRAM DESIGN FOR MASS CUSTOMIZATION                                                           |
| 01041  | Research on Plastic Removal Mechanism of Engineering Ceramics Grinding with Ultrasonic Assistance              |
| 01042  | REVERSE ENGINEERING PLANNING FOR HYPER-COMPLEX STRUCTURAL COMPONENTS                                           |
| 01043  | RESEARCH ON THE COORDINATION MECHANISM OF PRODUCT DEVELOPMENT CHAIN                                            |
| 01044  | Research on Intelligent Planer Cams CNC Grinding System                                                        |
| 01045  | ON SELF-ADAPTIVE VIBRATION TAPPING OF TITANIUM ALLOY                                                           |
| 01046  | EMBEDDED FLEXIBLE ASSEMBLY SYSTEM FOR CAR LATCH BASED ON LASER IDENTIFICATION                                  |
| 01047  | MEASUREMENT SYSTEM FOR 3-D FOOT SHAPES UNDER DIFFERENT LOADS                                                   |
| 01048  | Study on Whirlwind Envelope Milling Theory Applying on Extrusion Screw Machining                               |
| 01049  | MODELING OF MANUFACTURING INFORMATION SYSTEM BASED ON COMPLEXITY SCIENCE                                       |
| 01050  | CRANKSHAFT ROUNDNESS ERROR TRACING MEASUREMENT STRATEGY DURING NONCIRCULAR GRINDING PROCESS                    |
| 01051  | STUDY ON HIGH SPEED CUTTING MACHINABILITY OF MEDICAL TITANIUM ALLOY Ti-6Al-4V                                  |
| 01052  | CASE-BASED REASONING IN PRODUCT INNOVATION DESIGN                                                              |
| 01053  | A MODEL FOR MANUFACTURING COST ESTIMATION BASED ON MACHINING FEATURE                                           |
| 01054  | A Case Study in Top-down Collaborative Assembly Design                                                         |
| 01055  | RESEARCH ON THE THIN-WALLED WORKPIECE BORING BY APPLYING ULTRASONIC ELLIPTICAL VIBRATION CUTTING               |
| 01056  | Study on 3D Tool Compensation Algorithm in NC Milling                                                          |
| 01057  | A Two-Step PSO-ACO Approach to Optimize Flexible Jobshop Scheduling of Air Compressor Based on Petri Net Model |
| 01058  | RESEARCH ON OPTIMAL LAYOUT TECHNIQUES OF NC METAL CUTTING FOR POLYGONAL METAL PART                             |
| 01059  | PRE-DRAWING AND AIR-BULGING TECHNOLOGY OF SUPERPLASTIC FORMING FOR AUTOMOBILE MODELS                           |
| 01060  | Cell Assembly System for Fabricating Viable Three-Dimensional Constructs                                       |
| 01061  | DESIGN OF A DISPLACEMENT/ANGLE MEASUREMENT SYSTEM BASED ON LASER TRIANGULATION PRINCIPLE                       |
| 01062  | NUMERICAL SIMULATION OF THE GLASS SCREEN LAPPING                                                               |
| 01063  | MANUFACTURE ORIENTED FEATURE-BASED DESIGN                                                                      |
| 01064  | DESIGN AND RESEARCH ON THE PRECISE BAR CUTTING MACHINE BASED ON HIGH SPEED AND RESTRAINED STATE                |
| 01065  | RESEARCH ON EVOLVING RULE OF PART RELATION NETWORK OF PRODUCT FAMILY AND ITS APPLICATION                       |
| 01066  | OPTICAL MEASUREMENT TECHNOLOGY OF NANO-SCALE DISPLACEMENT                                                      |
| 01067  | PROFILE CURVES DESIGN OF TOOTH-SHAPE ROLLS                                                                     |
| 01068  | MEASURING APPARATUS AND TECHNOLOGY FOR MASTER GEARS                                                            |
| 01069  | RESEARCH ON AN INTEGRATED MANAGEMENT PLATFORM OF KNOWLEDGE-BASED INNOVATION DESIGN OF ORNAMENT                 |
| 01070  | Research on Web-based Visual Workflow Modeling and XPDL Parsing                                                |
| 01071  | Research on Computer Aided Product ShapeCreative Design System                                                 |
| 01072  | Study on Adaptive Slicing Algorithm of Functionally Gradient Material Components for Rapid Prototyping         |

International Technology and Innovation Conference 2006 — Advanced Manufacturing Technologies  
《技术与创新国际学术会议 — 先进制造技术》 目录

| Number | Title                                                                                                         |
|--------|---------------------------------------------------------------------------------------------------------------|
| 01073  | TOPOLOGICAL OPTIMIZATION OF AXISYMMETRICAL BODIES ON WATER ENTRIES                                            |
| 01074  | Research on RFID-Based Production Logistics Management Techniques with Application in Garment Industry        |
| 01075  | Research on model data transmission in layered feature-based collaborative design                             |
| 01076  | An Algorithm of JSSP With Dynamic Collection Of Job With priority                                             |
| 01077  | An Algorithm Of Shortening Idle Time For A Kind Of Special Assembly Problem                                   |
| 01078  | Numerical simulation of technology and grain size for large-sized aluminum alloy 7050 forging                 |
| 01079  | Research on Assembly Modeling and Sequence Planning Based on Features                                         |
| 01080  | NON-LINEAR MODELING AND EXPERIMENTAL STUDY OF A STREAMLINED PASSIVE HYDRAULIC MOUNT                           |
| 01081  | A QFD-ENABLED DESIGN FOR MANUFACTURING APPROACH VIA DESIGN KNOWLEDGE HIERARCHY AND RCE NETWORK                |
| 01082  | EXPERIMENTAL DETERMINATION OF CONVECTIVE HEAT TRANSFER COEFFICIENT IN WEDM                                    |
| 01083  | UNDIRECTED GRAPH MODEL OF PRODUCT FAMILY ARCHITECTURE FOR MASS CUSTOMIZATION                                  |
| 01084  | MICROSTRUCTURE AND PROPERTIES OF CENTRIFUGAL CAST BINARY Ti-Nb ALLOYS                                         |
| 01085  | REACTION OF TITANIUM ALLOYS WITH DIFFERENT MOULD SHELL MATERIALS                                              |
| 01086  | A MACHINE LEARNING BASED APPROACH OF ROBUST PARAMETER DESIGN                                                  |
| 01087  | THE STUDY OF A VIRTUAL MODULAR FIXTURE MANAGEMENT AND AID-DESIGN SYSTEM                                       |
| 01088  | A Framework for Adaptive Configuration of Business Model Oriented to Networks Deployment                      |
| 01089  | Synthesis and Mechanical Properties of Nanocrystalline Nickel Electroforming Layer in Pulse Deposition        |
| 01090  | CHARACTERIZATION OF NANOMETER SCALE TITANIUM FILM OXIDATION LINES AND MIM TUNNELING JUNCTION STRUCTURES       |
| 01091  | MANUFACTURING-ORIENTED BIONIC DESIGN METHOD FOR WIND TURBINE BLADE                                            |
| 01092  | THE TOPOLOGY OPTIMIZATION OF COMPLIANT MECHANISMS WITH GEOMETRICALLY NONLINEAR                                |
| 01093  | Research of product configuration model and personalized customization based on customer interest orientation |
| 01094  | STUDY OF ND:YAG PULSED LASER MILLING Al <sub>2</sub> O <sub>3</sub> CERAMIC IN WATER AND AIR CONDITION        |
| 01095  | A PHENOMENON OF LT-GaAs PHOTOCONDUCTIVE SWITCH TRIGGERED BY 800nm FEMTOSECOND LASER                           |
| 01096  | RESEARCH ON DEVELOPMENT AND SIMULATION OF INPUT/OUTPUT OF AS/RS DECISION SYSTEM                               |
| 01097  | THE STUDY ON LASER SINTERING METAL POWDER FOR MICRO FABRICATION                                               |
| 01098  | R&D ON LASER BEAM SCANNING MANUFACTURING SYSTEM BASED ON OEF GEOMETRY ALGORITHM & DEA CONTROL MODEL           |
| 01099  | RESEARCH ON PROCESS EVALUATION AND IMPROVEMENT                                                                |
| 01100  | HYBRID GRAPH DISASSEMBLY MODEL AND SEQUENCE PLANNING FOR PRODUCT MAINTENANCE                                  |
| 01101  | CONTACT SIMULATION AND SENSITIVITY RESEARCH OF QUASI-TRANSVERSE-DOUBLE-CIRCULAR GEARS                         |
| 01102  | RESEARCH ON THE PRODUCT COORDINATIVE DESIGN BASED ON DISTRIBUTED INTELLIGENT RESOURCES                        |
| 01103  | STUDY ON THE FEASIBILITY OF RAPID BIOLOGIC MANUFACTURE FOR MICROSYSTEM                                        |
| 01104  | The research of unorganized cloud data pre-processing in Reverse Engineering                                  |
| 01105  | THE GENETIC POLYGON ALGORITHM AND ITS APPLICATION IN CONCURRENT TOLERANCE OPTIMIZATION DESIGN                 |
| 01106  | NOVEL ELECTROFORMING PROCESS OF METAL MICROSTRUCTURES BY USING SHIELDED ANODE                                 |
| 01107  | NEURAL NETWORK BASED PID CONTROL ON NC MILLING PROCESS WITH HIGH-SPEED                                        |
| 01108  | STUDY ON VIRTUAL ORGANIZATION PRODUCT DEVELOPMENT BASED ON TOTAL LIFECYCLE AGILE MANUFACTURING IN THE         |

International Technology and Innovation Conference 2006 — Advanced Manufacturing Technologies  
《技术与创新国际学术会议 — 先进制造技术》 目录

| Number | Title                                                                                                                                       |

|--------|-------------------------------------------------------------------------------------------------------------------------|
| 01247  | PRINCIPLE OF COLD ROLLING HARMONIC GEAR AND RESEARCH ON THE EQUIPMENT                                                   |
| 01248  | RESEARCH ON MICRO/NANOMETRE MEASURING TECHNIQUE OF OPTICAL ASPHERIC SURFACE                                             |
| 01249  | PREDICTION OF EARING IN DRAWN CUP BASED ON CRYSTALLOGRAPHIC TEXTURE DATA OF SHEET METAL                                 |
| 01250  | FABRICATION OF NANO-TIPS EMPLOYING THREE DIFFERENT METHODS                                                              |
| 01251  | THE STRUCTURE ANALYSIS ON THE LADDER CANTILEVER MICROMACHINED TUNNELLING GYROSCOPE                                      |
| 01252  | EFFECTS OF ELECTRICAL PARAMETERS ON ELECTRICAL DISCHARGE GRINDING OF NON-CONDUCTIVE ENGINEERING CERAMICS                |
| 01253  | PARTICLE SHAPE CHARACTERIZATION OF BROWN CORUNDUM POWDERS BY SEM AND IMAGE ANALYSIS                                     |
| 01254  | A NEW METHOD FOR ANALYZING AND MONITORING MEASUREMENT PROCESS                                                           |
| 01255  | NUMERICAL SIMULATION OF ENERGY EFFECTS IN LASER BENDING OF THICK STEEL PLATE                                            |
| 01256  | CALCULATION MODEL OF THE DEFORMATION DUE TO GRINDING FORCE IN CRANK PIN NON-CIRCULAR GRINDING                           |
| 01257  | ANALYSIS OF THE TOOL-CHIP CONTACT LENGTH INCORPORATING THE EFFECTS OF SHEAR STRAIN                                      |
| 01258  | A SYSTEMATIC STUDY OF RIE FOR SILICON TIPS                                                                              |
| 01259  | MULTISCALE MODEL OF HONED PROFILES                                                                                      |
| 01260  | STUDY ON MATHEMATICAL TRANSFORMATION FOR MACHINING PROCESS PLANNING OF PARALLEL MACHINE TOOLS                           |
| 01261  | Kinematics analysis of a parallel machine tool based on genetic algorithms                                              |
| 01262  | Numerical simulation with element-free method based on the wavelet basis function in the sheet metal forming            |
| 01263  | STUDY ON AISI304 SHEET METAL FORMING BY LASER INDUCED THERMAL STRESS AND ITS RESIDUAL STRESS                            |
| 01264  | ESTABLISHMENT OF SURFACE ROUGHNESS PREDICTION MODEL FOR TURNING BRITTLE MATERIALS                                       |
| 01265  | RESEARCH ON THE MODEL AND APPLICATION OF KNOWLEDGE-BASED INDUSTRIAL DESIGN                                              |
| 01266  | CREATIVE DESIGN OF THE UNREFLECTING MACHINE FOR STAINLESS MOLDING BOARD                                                 |
| 01267  | STUDY ON THE GENERATION OF OPTIMAL ASSEMBLY SEQUENCE BASED ON A TREE MODEL                                              |
| 01268  | BENEFIT ALLOCATION MODEL OF MANUFACTURER AND ITS INFORMATION SERVICES PROVIDERS                                         |
| 01269  | Studies on the Modelling of the Regional Networked Manufacturing Enterprise Dynamic Alliance Based on the Ant Ecosystem |
| 01270  | Studies on the Information Potential Energy and the Information Difference in Networked Mass Customization              |
| 01271  | Research on Accuracy Design for Remanufactured Machine Tools                                                            |
| 01272  | INNOVATIVE CAD METHOD ON THE INTENSITY ANALYSIS OF LIFT-ARMS UNDER OFFSET LOADING CONDITION                             |
| 01273  | Study on the Building Method of Immersive Virtual Environments based on Commodity Components for Virtual Manufacturing  |
| 01274  | AN INFERENCE STUDY ON THE PROCESS CAPABILITY INDEX FOR NON-NORMAL DATA BASED ON MODIFIED WEIGHTED VARIANCE              |
| 01275  | STUDY ON CUSTOMIZATION MANUFACTURING OF SMALL AND MEDIUM-SIZED ENTERPRISE CLUSTER BASED ON POSTPONEMENT                 |
| 01276  | STUDY ON THE MODULARIZATION BUILDING AND IMPLEMENTATION OF SMALL AND MEDIUM-SIZED ENTERPRISES' VIRTUAL ORGANIZATION     |
| 01277  | THE CHECKOUT AND FORECAST FOR THE PRODUCT PERFORMANCE ONLINE                                                            |
| 01278  | RESEARCH AND REALIZATION ON COMPLICATE DENSE POINTS RECONSTRUCTION SYSTEM                                               |
| 01279  | NEW LOWER BOUND FOR SINGLE MACHINE TOTAL TARDINESS PROBLEM WITH SEQUENCE DEPENDENT SETUP                                |

International Technology and Innovation Conference 2006 — Advanced Manufacturing Technologies

| 01281  | EXPERIMENTAL STUDY OF LASER CLADDING FORMING IRON-BASED ALLOYS                                                                               |
| 01282  | THE RESEARCHES ON THE MOULD MANUFACTURING GRID                                                                                               |
| 01283  | DYNAMIC ANALYSIS AND OPTIMIZATION OF ELECTROMECHANICAL COUPLING SYSTEM                                                                       |
| 01284  | RESEARCH ON THE MOTORIZED SPINDLE' S THERMAL PROPERTIES BASED ON THERMO –MECHANICAL COUPLING ANALYSIS                                        |
| 01285  | RESEARCH ON KEY TECHNOLOGIES OF GRID-BASED APPLICATION SERVICE PROVIDER PLATFORM                                                             |
| 01286  | APPLICATION OF TASK GRAPH AND SIMULATION TO ANALYSIS EFFECT OF RANDOM EVENTS ON SCHEDULING                                                   |
| 01287  | RESEARCH ON A NOVEL APPROACH TO MULTI-AXIS LINE CONTACT MILLING                                                                              |
| 01288  | Research on PLM Multidimensional Data Model                                                                                                  |
| 01289  | DISCUSSION ON THE IMPROVED DIFFRACTIVE SUPERRESOLUTION ELEMENT OF THE TWO-PHOTON MICROFABRICATION                                            |
| 01290  | First automatic empty container yard with no operator in China                                                                               |
| 01291  | BUCKLING ANALYSIS OF A 2-DOF PARALLEL MECHANISM COMPOSED OF RIGHT-ANGLE-NOTCH FLEXURE UNIVERSAL HINGES                                       |
| 01292  | A COMBINED COLLABORATIVE DESIGN PLATFORM FOR LARGE-SCALE EQUIPMENT INSTALLATION                                                              |
| 01293  | RESEARCH ON PARAMETRIC DESIGN APPROACH OF BODY SKELETON OF PASSENGER CAR                                                                     |
| 01294  | THE RESEARCH ON MATERIAL SELECTION AND STRAIN ANALYSIS OF VEHICLE COMPLICATED DEFORMABLE PARTS WITH ASAME                                    |
| 01295  | A New Approach of SUPPLY NETWORK PERFORMANCE MEASUREMENT based on supporting level and operational level                                     |
| 01296  | RESEARCH ON OWL- BASED PROCESS MODEL TRASFORMATION FOR INTEROPERABILITY                                                                      |
| 01297  | THE MODELING AND ANALYSIS OF GEOMETRIC ERROR FOR MACHINING CENTER BY HOMOGENEOUS COORDINATE TRANSFORMATION METHOD                            |
| 01298  | RESEARCH ON MANUFACTURABILITY EVALUATION METHOD FOR MECHANICAL PART                                                                          |
| 01299  | VIRTUAL PROTOTYPING OF KEY PARTS OF PRINTING PRESS                                                                                           |
| 01300  | EVALUATION OF THE EMD END EFFECT AND A WINDOW BASED METHOD TO IMPROVE EMD                                                                    |
| 01301  | Genetic Simulated Annealing Algorithm-BASED Assembly Sequence Planning                                                                       |
| 01302  | IMPROVING GEAR SIGNALS ANALYSIS METHODS FOR RADIAL BASIS FUNCTION NEURAL NETWORK AUTOMATIC RECOGNITION                                       |
| 01303  | VIRTUAL FATIGUE TEST SYSTEM AND ITS KEY TECHNOLOGIES FOR CONSTRUCTION VEHICLES                                                               |
| 01304  | FLUID MAGNETIC ABRASIVES AND ITS APPLICATIONS IN THE PRECISION FINISHING PROCESS                                                             |
| 01305  | RESEARCH ON KEY TECHNIQUE OF THE NEW TYPE SELF-DRIVEN TOWING MACHINE FOR CABLE                                                               |
| 01306  | An analysis of Supplier Involvement in Manufacturing Supply Chain Management                                                                 |
| 01307  | Crankpin Non-circular Grinding Progress Error Forecast and Compensation Based On RBF-NN                                                      |
| 01308  | Online Measuring Method and System for Diameter Parameters of Wheel Set                                                                      |
| 01309  | RESEARCH ON THE KEY TECHNIQUE FOR NUMERICAL CONTROL GRINDING ARBITRARY N-POLYGON SHAFTS                                                      |
| 01310  | RESEARCHING FOR THE UNBOUNDED MAGNETIC ABRASIVE APPLICATION IN MAGNETIC ABRASIVE FINISHING                                                   |
| 01311  | AN EMPIRICAL RESEARCH ON THE RELATIONSHIP AMONG ORGANIZATIONAL BOUNDARY, FLEXIBILITY AND PERFORMANCE OF THE MANUFACTURE IN PEARL RIVER DELTA |
| 01312  | A NEW MICRO-EDM REVERSE COPYING TECHNOLOGY FOR MICROELECTRODE ARRAY FABRICATION                                                              |

International Technology and Innovation Conference 2006 — Advanced Manufacturing Technologies  
《技术与创新国际学术会议 — 先进制造技术》 目录

| Number | Title                                                                                                        |
|--------|--------------------------------------------------------------------------------------------------------------|
| 01313  | A NEW TYPE OF AEROSTATIC THRUST BEARING WITH HIGH STIFFNESS                                                  |
| 01314  | AN IMMUNE ALGORITHM FOR BATCH JOB-SHOP SCHEDULING WITH MULTI-OBJECTIVES                                      |
| 01315  | Study on Measurement of Flame Temperature Using a Linear CCD                                                 |
| 01316  | RESEARCH ON PRODUCT CONFIGURATION BASED ON KNOWLEDGE                                                         |
| 01317  | Quality Control of Hypoid Gears Using Gear Measuring Machine                                                 |
| 01318  | SIMULATION SYSTEM OF OPERATING PERFORMANCE OF HYPOID GEARS                                                   |
| 01319  | RESEARCH ON A METHOD OF INJECTION MOLDING MACHINE CONFIGURATION DESIGN BASED ON INSTANCES                    |
| 01320  | Investigation of Turning Tool System with On-line Tool Geometry Adjustment                                   |
| 01321  | TECHNOLOGY INNOVATION OF DEVELOPING COUNTRIE IN THE CONTEXT OF GLOBALIZATION: A CASE STUDY                   |
| 01322  | RESEARCH ON THE FORMING FORCES DURING THE 3D NON-AXISYMMETRIC THIN-WALLED TUBES NECK-SPINNING                |
| 01323  | RESEARCH ON STRUCTURE DYNAMIC OPTIMIZATION DESIGN OF NC GRINDER                                              |
| 01324  | APPLICATION RESEARCH OF X3D IN INDIVIDUALIZED PRODUCTS CUSTOMIZATION                                         |
| 01325  | Optimization of Cutting Parameters During Cutting Based on the FEA and Neural Networks                       |
| 01326  | A study on the relation between enterprise competitive advantage and CRM based on data mining                |
| 01327  | Input and output optimization study on hierachical manufacture systems integrating context knowledge         |
| 01328  | FINITE ELEMENT AND EXPERIMENTAL MODAL ANALYSIS OF ULTRA-PRECISION AIR BEARING LINEAR MOTION STAGE            |
| 01329  | THE MODELING OF COMPLEX SYSTEM BASED ON DYNAMIC CONTROL CELL STRUCTURE                                       |
| 01330  | A NEW SUPPLY CHAIN MATURITY MODEL WITH 3-DIMENSION PERSPECTIVE                                               |
| 01331  | PROCESS INTEGRATION METHOD BY USING BOM MULTI-VIEW MAPPING TECHNIQUES IN BIW PRODUCTION                      |
| 01332  | Intelligent Cutting Equipment of Gas Pipe Based on PC Controlling                                            |
| 01333  | Laser shock processing of titanium alloy                                                                     |
| 01334  | PERFORMANCE EVALUATION OF TANTALUM NITRIDE THIN FILM HARD COATED K20 CARBIDE INSERT ON MACHINING INCONEL 600 |
| 01335  | Influence surface finish on airfoil design                                                                   |
| 01336  | TOOLPATH GENERATION FOR 2D PROFILES IN CO2 LASERMACHINE SYSTEM                                               |
| 01337  | FUNCTIONAL PROTOTYPING OF SPECIAL PURPOSE MACHINES USING HARDWARE-IN-THE-LOOP SIMULATION                     |
| 01338  | SQUARE HOLE FABRICATION IN MICRO NANO SCALE BY LOW ENERGY ECR ION BEAM IRRADIATION                           |
| 01339  | REDUCTION OF CALCULATION TIME IN GEAR SHAVING SIMULATION                                                     |
| 01340  | THE DESIGN AND FINITE ELEMENT ANALYSIS FOR THE ULTRASONIC AMPLITUDE TRANSFORMER BAR                          |
| 01341  | FEATURE-BASED PROCESS PLANNING USING STEP-NC                                                                 |
| 01342  | Build the Service Infrastructure of Virtual Enterprise                                                       |
| 01343  | Structure Design of a High-sensitivity MOEMS Accelerometer                                                   |
| 01344  | Rapid prototyping of Three-dimensional cell/matrix constructs                                                |
| 01345  | Lightweight Design of Auto-body Structure by Topology Optimisation based on Level Set Method                 |
| 01346  | RESEARCH AND APPLICATION OF BIO-HIERARCHY STRUCTURE                                                          |
| 01347  | Improving the localization of electrochemical Micro-manufacturing with Nanosecond Pulse Duration             |
| 01348  | RESEARCH AND FEM SIMULATION ON THE HYDROFORMING FOR REAR AXLE HOUSING OF LIGHT VEHICLE                       |

International Technology and Innovation Conference 2006 — Advanced Manufacturing Technologies  
《技术与创新国际学术会议 — 先进制造技术》 目录

| Number | Title                                                                                                                             |
|--------|-----------------------------------------------------------------------------------------------------------------------------------|
| 01349  | RESECH ON FORMING PRINCIPLE OF THE TECHNOLOGY BY FORWARD EXTRUSION AND CROSS ROLLING FOR THE REAR AXLE SHAFT SLEEVE OF AUTOMOBILE |
| 01350  | RESEARCH ON REMOTE MONITOR SYSTEM OF ACCURATE GRINDING MANUFACTURING PROCEDURE BASED ON SSA                                       |
| 01351  | Research on measuring model for parallel robot coordinate measuring machine                                                       |
| 01352  | ANALYSIS OF MAPPING FORM BUSINESS MODEL TO WORKFLOW MODEL                                                                         |
| 01353  | Multi-ultrasonic Sensor Fusion Based on Dezert-Smarandache Theory                                                                 |
| 01354  | A GIS-BASED INFORMATION SHARING INFRASTRUCTURE FOR CONTAINER PORT LOGISTICS USING DATA MINING AND VISUALIZATION TECHNOLOGY        |
| 01355  | Application of Liquid Crystal Light Valve in Robot Vision System                                                                  |
| 01356  | VIBRATION CONTROLLABILITY OF UNDERACTUATED ROBOTS WITH FLEXIBLE LINKS                                                             |
| 01357  | DESIGN OF NEW STYLE FOOT-CUTTING MACHINE USED IN PCB PRODUCT LINE                                                                 |
| 01358  | ROLLING BEARINGS FAULT DIAGNOSIS BASED ON WAVELET-NEURAL NETWORK                                                                  |
| 01359  | DESIGN FOR WORKFLOW TECHNOLOGY ORIENTED KNOWLEDGE MANAGEMENT SYSTEM                                                               |
| 01360  | Fuzzy decoupling control of melt temperature and melt pressure for plastic electromagnetism dynamic extruder                      |
| 01361  | An Improved Servo Control System for High Speed Flat Industrial Sewing Machine                                                    |
| 01362  | REGENERATIVE BRAKING CONTROL SYSTEM IMPROVEMENT FOR PARALLEL HYBRID E LECTRIC VEHICLE                                             |
| 01363  | RESEARCH ON INTELLIGENT CVC ROLL GRINDING AND INTERPOLATION STRATEGY                                                              |
| 01364  | A Multi-Axis Synchronous Register Control System for Color Rotogravure Printer                                                    |
| 01365  | Adaptive Control of Linear Velocity and Tension in Winding System of Dry Plastic Film Laminating Machine                          |
| 01366  | Kinematics and Dynamics Analysis of Maintenance Manipulator                                                                       |
| 01367  | Information Storage and Intelligent Interface for Use In Intelligent Magnetic Bearings                                            |
| 01368  | KINEMATICS ANALYSIS OF ACTIVE REFLECTOR SUPPORTING MECHANISM FOR FAST                                                             |
| 01369  | The Design of Fuzzy PID Multi-channel Temperature Control System Based on Neural Network                                          |
| 01370  | The Research of the Anti-surge Control System Based on CAN Bus for Centrifugal Compressor                                         |
| 01371  | COLLABORATIVE FILTERING RECOMMENDATION ALGORITHM BASED ON LOOK-AHEAD SELECTIVE SAMPLING                                           |
| 01372  | RESEARCH ON FLEXIBLE ACCELERATION AND DECELERATION METHOD OF NC SYSTEM                                                            |
| 01373  | STUDY ON DIRECT TORQUE CONTROL OF PERMANENT MAGNET SYNCHRONOUS MOTOR BASED ON OBSERVING STATOR FLUX LINKAGE                       |
| 01374  | System Identification for Mechatronics/Electronic-hydraulics Servo Device Based on LabVIEW                                        |
| 01375  | STUDY ON MULTI-AGENT SYSTEMS TASK DISTRIBUTION NEGOTIATION BASED ON LOOSE COALITION                                               |
| 01376  | Fault Diagnosis of Automobile Main Reducer Based on Correlation Dimension                                                         |
| 01377  | TWO Effective control Algorithms for a pneumatic system                                                                           |
| 01378  | Kinematic properties of wheeled mobile robots in round ducts/pipes                                                                |
| 01379  | OPTIMAL CONTROL AND DESIGN OF FLEXIBLE MANIPULATORS BASED ON LQR OUTPUT FEEDBACK                                                  |
| 01380  | STUDY ON REAL-TIME CONTROL OF HUMANOID ROBOT USING SURFACE EMGS                                                                   |
| 01381  | ARCHITECTURE SINGULARITY ANALYSIS FOR A CLASS OF PARALLEL MANIPULATORS                                                            |
| 01382  | REALIZATION OF CLOSE COUPLING PLANE DOUBLE INVERTED PENDULUM BASED ON DIGITAL MOTION TECHNOLOGY                                   |

| Number | Title                                                                                                                 |
|--------|-----------------------------------------------------------------------------------------------------------------------|
| 01383  | RESEARCH ON THE HYBRID CAM-LINKAGE MECHANISM REALIZING TRAJECTORY                                                     |
| 01384  | RESEARCH ON THE OPEN MANIPULATOR CONTROLLER FOR ASSISTING THE ELDERLY AND THE DISABLED                                |
| 01385  | RESEARCH ON THE FUNCTION AND THE ORIENTATION SYSTEM OF THE STIRRING ROBOT WORKING IN SLURRY                           |
| 01386  | AUTOMATIC DEFECTS DETECTION BASED ON ADAPTIVE WAVELET PACKETS FOR LEATHER MANUFACTURE                                 |
| 01387  | MULTI-STEP PREDICTIVE MODEL OF AIR FUEL RATIO FOR GASOLINE ENGINE BASED ON NEURAL NETWORK                             |
| 01388  | TWO-DEGREE-OF-FREEDOM ROBUST CONTROL WITH APPLICATION IN THE NON-CIRCULAR TURNING                                     |
| 01389  | A SIX WHEELED ROBOT WITH ACTIVE SELF-ADAPTIVE SUSPENSION FOR LUNAR EXPLORATION                                        |
| 01390  | PLC APPLIED HIGH PRECISION WEIGHING FOR FEEDING BULK STUFF                                                            |
| 01391  | MAGNETIC DYNAMIC ABSORBER WITH ON-LINE MONITORING FUNCTION                                                            |
| 01392  | THE EXPERIMENT RESEARCH OF FORCE CONTROL BASED ON INTELLIGENT PREDICTION IN UNKNOWN ENVIRONMENT                       |
| 01393  | STUDY ON LARGE RADIUS OF SPHERICAL FIDUCIAL SURFACE OF BEARING OF HIGHSPEED RAILWAY FORMING BASE ON VIRTUAL AXIS      |
| 01394  | STUDY ON THREE-DIMENSIONAL SURFACE RECONSTRUCTION OF BLACK MELON SEEDS USING PHOTOMETRIC STEREO                       |
| 01395  | RESEARCH OF TENSION ROBUST CONTROL BASED ON MIXED SENSITIVITY                                                         |
| 01396  | RESEARCH OF INPUT-OUTPUT ENERGY DECOUPLING IN TENSION SYSTEM                                                          |
| 01397  | APPLICATION OF PIEZOELECTRIC IMPEDANCE TECHNOLOGY IN STRUCTURAL DAMAGE DETECTION                                      |
| 01398  | RESEARCH ON THE CONTROL SYSTEM OF SERVO PRESSES                                                                       |
| 01399  | Research on path-planning method of a redundant modular robot                                                         |
| 01400  | An improved algorithm for inverse kinematics solution of redundant modular robots                                     |
| 01401  | RESEARCH ON FEEDFORWARD CONTROL SYSTEM OF TANDEM COLD ROLLING MILL' S HYDRAULIC AGC AND ITS COMPUTER CONTROL STRATEGY |
| 01402  | APPLICATION OF INTELLIGENT CONTROL BASED ON PROCESS IDENTIFICATION IN BERYLLIUM-BRONZE HEAT TREATMENT                 |
| 01403  | Active Vibration Control System of FAST Feed System Based on PMAC Controller                                          |
| 01404  | Study on a spiral-type robot magnetically controlled in biotic tracts                                                 |
| 01405  | AN APPLICATION OF OPC TECHNOLOGY IN GAS TURBINE INLET AIR COOLING SYSTEM                                              |
| 01406  | HYDRAULIC BEND CONTROL SYSTEM RESEARCH OF FUZZY SELF-ADAPTIVE PID BASED ON VIRTUAL INSTRUMENT                         |
| 01407  | STUDY OF TELEROBOT WITH TACTILE TELE-PRESENCE AND MYOELECTRIC BIONIC CONTROL                                          |
| 01408  | DESIGN OF A NEW TYPE THREE-AXIS ACCELERATION SENSOR                                                                   |
| 01409  | RESEARCH AND APPLICATION OF AUTOMATION TECHNOLOGY IN RENOVATION FOR OLD IMPORT MACHINE TOOL                           |
| 01410  | Modeling and Simulation Research on Move-in-Mud Robot Based on Creeping Principle                                     |
| 01411  | A GEOMETRIC APPROACH TO THE FOUR-FINGER GRASPING PLANNING OF POLYGONAL OBJECTS                                        |
| 01412  | RESEARCH ON HIGH PRECISION CONTROL SYSTEM OF A HYBRID FIVE-BAR ACTUATOR                                               |
| 01413  | OPEN-CYCLE ABSORPTION AIR-CONDITIONING TESTING SYSTEM                                                                 |
| 01414  | DEVELOPMENTS IN REAL-TIME CONTROL WITH ETHERNET                                                                       |
| 01415  | Research and implementation of an on-line fault diagnosis expert system for the chemical process                      |
| 01416  | The Design Of RFID Thruway No Stop Electronic Toll Collection System On The Basis Of TCP/IP Protocol                  |
| 01417  | THE RESEARCH OF A BIONIC ROBOT THAT CAN WALK ON WATER SURFACE BASED ON WATER STRIDER                                  |

International Technology and Innovation Conference 2006 — Advanced Manufacturing Technologies  
《技术与创新国际学术会议 — 先进制造技术》 目录

| Number | Title                                                                                                                 |
|--------|-----------------------------------------------------------------------------------------------------------------------|
| 01418  | HAND-HELD STATE MONITORING AND FAULT DIAGNOSIS SYSTEM FOR OIL FIELDS POURING AND PICK EQUIPMENT                       |
| 01419  | EMBEDDED INDUSTRY MONITORING NETWORK DATA BASE SERVICE BASED ON UPnP                                                  |
| 01420  | ENERGY INTEGRATION AND ECONOMICAL OPTIMIZATION OF SMALL SCALE CCHP SYSTEM                                             |
| 01421  | RESEARCH ON VARIABLE VALVE SYSTEM BASED ON ELECTRO-HYDRAULIC DRIVE                                                    |
| 01422  | EXPERIMENT ON WIRELESS SENSOR VIBRATION ENERGY COLLECTION                                                             |
| 01423  | DEVELOPMENT OF A PLATE-LAMINATED METHANOL STEAM REFORMER FOR HYDROGEN PRODUCTION                                      |
| 01424  | Operation Parameters Optimization of Centrifugal Pumps in Multi-Sources Water Injection System                        |
| 01425  | EMBEDDED SYSTEM OF TEMPERATURE TESTING BASED ON DS18B20                                                               |
| 01426  | RESEARCH ON DEVELOPMENT OF THE VISCOELASTIC SUSPENSIONS USED IN CONSTRUCTION VEHICLES                                 |
| 01427  | CONTROLLED RECTIFICATION AND STEADY VOLTAGE TECHNOLOGY OF THE PERMANENT-MAGNET GENERATING SET ON VEHICLE              |
| 01428  | Research on energy saving in accelerated life testing for the aero hydraulic pumps                                    |
| 01429  | Study on Variable Pitch System Characteristics of Big Wind Turbine                                                    |
| 01430  | VIRTUAL INSTRUMENT AND FREQUENCY CONVERSION TECHNOLOGY-BASED BRAKE TEST SYSTEM                                        |
| 01431  | A Model for Flexural Vibration of Laminated Beams EMBEDded with Piezoelectric Layers Including Shear Deformation      |
| 01432  | Study on Speed-sensorless Vector Control Transducer Based on DSP                                                      |
| 01433  | IMPROVED MSPCA WITH APPLICATION TO PROCESS MONITORING                                                                 |
| 01434  | EFFICIENCY IMPROVEMENT OF MSW INCINERATOR WITH A NOVEL MSW INCINERATION TECHNOLOGY INTEGRATED WITH BIOCHEMICAL METHOD |
| 01435  | STUDY ON MICRO MODELING EQUIPMENT OF CONDENSER-THROAT                                                                 |
| 01436  | ANALYSIS AND RESEARCH OF EDDY CURRENT DETECTOR BASED ON VIRTUAL PROTOTYPE                                             |
| 01437  | ENERGY AND ECONOMIC OPTIMIZATION FOR AUTOMOBILE PAINTING PROCESS                                                      |
| 01438  | RESEARCH ON INVENTIVE PROBLEM SOLVING PROCESS MODEL BASED ON AHP/TRIZ                                                 |
| 01439  | Study of Pneumatic Capsule Transportation Pipeline Driven by Electromagnetic Force                                    |
| 01440  | RESEARCH ON FTA DRIVING MODULE IDENTIFYING TECHNOLOGY                                                                 |
| 01441  | APPLICATION OF MODIFIED GREY MODELING METHOD TO FORECASTING THE TEMPERATURE DURING ELECTRIC FIELD ASSISTED SINTERING  |
| 01442  | Standardizing components for product family configuration design                                                      |
| 01443  | A TWO-PHASE HEURISTIC ALGORITHM TO SOLVE THE LARGE-SCALE VEHICLE ROUTING PROBLEM                                      |
| 01444  | Mold design and temperature field analysis on electric current sintering of electrically conductive powders           |
| 01445  | INTEGRATED PIPELINE TRANSPORT AND DISPOSAL SYSTEM FOR SOLID WASTE COAL SLUDGE                                         |
| 01446  | PROPERTIES OF IMPINGING FLAMES IN ENTRAINED-FLOW GASIFIER WITH OPPOSED MULTI-BURNER                                   |
| 01447  | Research on Fault Diagnosis of Electric Appliance for Vehicle Based on CAN Bus                                        |
| 01448  | A DISCRETIZING APPROACH FOR PREDICTING SCATTER FATIGUE CRACK NUCLEATION LIFE                                          |
| 01449  | RESEARCH ON THE ULTRAVIOLET-CURING RESIN WIRE SAW                                                                     |
